The Xerox Alto is the first computer designed from its inception to support an operating system based on a graphical user interface (GUI), later using the desktop metaphor. The first machines were introduced on 1 March 1973, a decade before mass market GUI machines arose. The Alto is contained in a relatively small cabinet and uses a custom central processing unit (CPU) built from multiple SSI ...

LyX is a document processor that encourages an approach to writing based on the structure of your documents and not simply their appearance (). LyX combines the power and flexibility of TeX/LaTeX with the ease of use of a graphical interface. This results in world-class support for creation of mathematical content (via a fully integrated equation editor) and structured documents like academic ...
