Integrated drives make the most efficient inline pumps even more efficient. The combination of integrated Technologic variable speed drives with the e-80 direct coupled and e-80SC split coupled pumps creates a highly energy efficient pump and drive package. The ITSC offers a sensorless option utilizing the latest generation hardware platform with advanced pumping software and proven algorithms.

Electrical sampling pumps and controllers from Geotech and Grundfos for low flow sampling and purging, portable or dedicated.

Electrical Low Flow Sampling Pumps and Systems

A pump is a device that moves fluids (liquids or gases), or sometimes slurries, by mechanical action. Pumps can be classified into three major groups according to the method they use to move the fluid: direct lift, displacement, and gravity pumps. Pumps operate by some mechanism (typically reciprocating or rotary), and consume energy to perform mechanical work for moving the fluid.
