

### **restoration ecology and sustainable pdf**

Restoration ecology is the scientific study supporting the practice of ecological restoration, which is the practice of renewing and restoring degraded, damaged, or destroyed ecosystems and habitats in the environment by active human intervention and action.. Many people recognize that biodiversity has an intrinsic value and that we have a responsibility to conserve it for future generations.

### **Restoration ecology - Wikipedia**

Ecology; Ecology addresses the full scale of life, from tiny bacteria to processes that span the entire planet. Ecologists study many diverse and complex relations among species, such as predation and pollination. The diversity of life is organized into different habitats, from terrestrial (middle) to aquatic ecosystems.

Description: Journal of Applied Ecology publishes novel papers that apply ecological concepts, theories, models and methods to the management of biological resources in their widest sense. The editors encourage contributions that use applied ecological problems to test and develop basic ecological theory, although there must be clear potential for improving management.

Red Mangrove or 'Walking Mangrove' (*Rhizophora mangle*) are used by the Reef Ball Foundation in conjunction with reef restoration work because mangrove estuary systems work together with reef systems with a complex web of interactions. The roots of the Red Mangrove look like legs walking into the water which is why it is sometimes call the 'Walking Mangrove.'
