Multiple edges are two or more edges that connect the same two vertices. A loop is an edge (directed or undirected) that connects a vertex to itself; it may be permitted or not, according to the application. In this context, an edge with two different ends is called a link.. A multigraph, as opposed to a simple graph, is an undirected graph in which multiple edges (and sometimes loops) are ...

I get asked about the sewing machines I use quite often. If I had more space, I would probably have about a dozen different machines all set up for different tasks. In general, I like simple machines. You can spend a lot of money on a sewing machine with tons of features, different types of stitches, and touch screens. I doubt most people utilize all of these features, and I feel that the more ...
